DATA ANALYTICS
FORENSIC ACCOUNTING & FRAUD INVESTIGATION

Tyson Slesnick is a versatile problem solver with 12+ years of progressive experience performing data analytics and developing business intelligence solutions in financial services.

Tyson supports our senior testifying experts by investigating and distilling large sets of financial data. He applies his advanced data analytics skills to find key insights and evidence that will form the basis of reported opinions.

His broad experience includes quantitative financial analysis, software development, and implementation and forecasting analysis. He has worked with various databases and software solutions to create custom queries and automated processes that help identify and correct data issues. Having passed the CPA exam and currently pursuing his CPA, he's fluent in accounting and has conducted comprehensive monthly reviews of balance sheets, income statements, and cash flow statements in a prior role.

Tyson was previously with a multinational financial services company where he synthesized and optimized large volumes of data to improve processes and practices and provide valuable information to end users and financial advisors.
